**DETAILED ACTION*****Election/Restrictions***

Applicant's election with traverse of Group I (claims 1-8 and 16-17) in the reply filed on 21 June 2004 is acknowledged. The traversal is on the ground(s) that the inventions of Groups I and 11 are so closely related in the field of calibrating imaging devices that a proper search of any of the claims would, of necessity, require a search of the others and therefore all of the claims can be searched simultaneously rather than performing a duplicative search, with possibly inconsistent results, which may occur if the restriction requirement is maintained.

This is not found persuasive because, while the search of both inventions overlaps, different classification and electronic text searches must be performed for each invention which are not required for the other and which entail more than just a few additional subclasses and text search variations.

The requirement is still deemed proper and is therefore made FINAL.

***Allowable Subject Matter***

Claims 1-8 and 16-17 are allowed. The prior art searched and of record neither anticipates nor suggests in the claimed combinations, discriminating whether a chart, read in generating a calibration condition, is appropriate.

Art Unit: 2626

### ***Specification***

The abstract of the disclosure is objected to because two paragraphs are used. A single paragraph of not more than 150 words should be used.

Correction is required. See MPEP § 608.01(b).

### ***Conclusion***

This application is in condition for allowance except for the above objection and the presence of claims 9-15 and 18 drawn to an invention non-elected with traverse. Applicant must take action to correct the abstract and to cancel or take other action on the non-elected claims to pass the case to issue.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
